Professional Summary

AI & Data Science undergraduate at CBIT with strong foundations in Data Structures & Algorithms, Object-Oriented Programming, Java, Python, SQL, and Software Engineering. Experienced in building scalable full-stack applications using React, Next.js, Spring Boot, REST APIs, and modern databases while developing AI-powered solutions. Passionate about designing scalable software systems and building high-quality software solutions following software engineering principles.

Education

Chaitanya Bharathi Institute of Technology(CBIT) Sep 2023 - Present

Bachelor of Engineering (BE) in Artificial Intelligence And Data Science | (OU) Osmania University Hyderabad Telangana India

CGPA: 8.02/10

Expected Graduation: May 2027

Experience

Testers Community Jun 2026 - Present

Software Developer Intern

ReachFront - <https://www.reachfront.ai/>

- Contributed to an AI-powered SaaS platform for automated lead generation and customer engagement.
- Developed scalable frontend features using React, Next.js, and TypeScript while integrating REST APIs and AI-driven workflows.
- Automated structured data collection and lead enrichment using Serper API and Oxylabs.
- Integrated Supabase authentication and database services for secure user management and efficient data handling.
- Optimized application performance by improving Core Web Vitals, reducing page load times, and enhancing frontend responsiveness.
- Collaborated using Git/GitHub workflows, Agile development practices, and peer code reviews.

Skills

Programming Languages: Java, Python, SQL, JavaScript, TypeScript

Core Concepts: Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Machine Learning & AI: TensorFlow, Scikit-learn, Pandas, NumPy, Deep Learning, Model Evaluation

Generative AI: LLMs, Prompt Engineering, AI Applications

Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS

Backend: Spring Boot, Node.js, REST APIs

Databases: MySQL, Firebase, Supabase

Tools: VS Code, Git, GitHub, Supabase, Serper API, Oxylabs

Projects

QuantVision AI Terminal (AI Stock Prediction System) May 2026

- Designed and developed an end-to-end stock prediction platform using React, Next.js, Python, and TensorFlow.
- Performed structured data preprocessing, feature engineering, normalization, and exploratory data analysis.
- Engineered 15+ financial indicators including RSI, MACD, Bollinger Bands and Moving Averages.
- Achieved 82% directional prediction accuracy using TensorFlow.
- Evaluated model performance through prediction analysis and interactive visualizations.
- Built interactive dashboards using Plotly for real-time visualization and prediction analysis.
- Implemented modular application architecture by integrating frontend components with the prediction engine through REST APIs.

Technologies: React, Next.js, Python, TensorFlow, REST APIs, Git, Pandas, NumPy, Plotly.js, Scikit-learn

- Developed a full-stack AI-powered recommendation platform for personalized fashion suggestions.
- Processed structured user preference data to improve recommendation accuracy.
- Integrated REST APIs with a responsive frontend and Firebase backend to deliver personalized recommendations.
- Improved recommendation relevance by 80% through user profiling and recommendation optimization.

Technologies: React, Typescript, JavaScript, Firebase, REST APIs, Git, AI/ML, CSS

Achievements

- Solved 200+ Data Structures & Algorithms problems across LeetCode and Smart Interviews.
- Built and deployed 3+ full-stack and AI-powered applications using React, Next.js, Spring Boot, and Machine Learning.
- Completed Deloitte Data Analytics Job Simulation focusing on data analysis and business insights.

Certifications

- Data Structures & Algorithms Mastery - Smart Interviews
- Data Science With Python - Smarted Innovations
- Data Analytics Job Simulation - Deloitte
- Web Development - Internshala Trainings
